

**I CLAIM:**

1. A replaceable bedding structure for double uses in winter  
and summer, comprising:

a body; and

5 a cover encasing the body having a bottom cover and  
a upper cover coupling with the bottom cover;

10 wherein the bottom cover has an opening and a coupling  
section located on the periphery of the opening, the upper  
cover having a base, a plurality of spaced blocks laid  
on the base interconnected by connection threads, and a  
connecting section located on the outer periphery of the  
base to engage with the coupling section so that the upper  
cover and the bottom cover are coupled to encase the body.

15 2. The replaceable bedding structure of claim 1, wherein  
the blocks are flat bamboos.

3. The replaceable bedding structure of claim 1, wherein  
the coupling section and the connecting section are  
zippers.

20 4. The replaceable bedding structure of claim 1, wherein  
the blocks are spherical balls.
